Professional Summary:

Results-driven Data Scientist with hands-on experience in **data analysis, data cleaning, and data preprocessing**. Proficient in **Python (Pandas, NumPy, Scikit-learn), SQL, and Excel**, with strong expertise in **exploratory data analysis (EDA), statistical analysis, and data visualization using Matplotlib and Seaborn**. Experienced in building and evaluating **machine learning models** and applying **predictive modeling techniques** to extract actionable insights and support **data-driven decision-making**. Skilled in working with **structured and unstructured data**, with a solid understanding of **end-to-end data science workflows**, including **feature engineering, model evaluation, and model optimization**. Demonstrates strong **problem-solving, analytical thinking, and communication skills**, with a commitment to continuous learning and applying advanced analytics techniques.

Skills:

- Data Analysis
- Predictive Analytics
- EDA
- Excel
- Python
- Pandas
- Scikit-learn
- Seaborn
- Communication
- Time Management
- Machine Learning
- Statistical Modeling
- Data Cleaning
- Jupyter Notebook
- SQL
- NumPy
- Matplotlib
- Plotly
- Teamwork
- Attention to Detail

Experience :

Data Science Intern, CodeAlpha Remote | June 2025 – July 2025

- Developed 3+ data science projects using Python and Machine Learning, including predictive models and interactive dashboards.
- Published projects on GitHub, increasing portfolio visibility and demonstrating technical skills.
- Improved data processing and model performance, achieving up to 10–15% higher prediction accuracy.
- Collaborated with a remote team to deliver end-to-end data science solutions.

Data Science Track Participant, Digital Egypt Pioneers
Tanta, Egypt | November 2023 – May 2024

- Completed 100+ hours of hands-on training in data analysis, machine learning, and AI applications.
- Built 5+ projects, including predictive models and dashboards with up to 90% accuracy.
- Presented insights and results in a collaborative team environment.

AI & Data Foundations Trainee, IBM SkillsBuild
Remote | July 2023 – December 2023

- Completed structured training in AI, data analysis, and core data science concepts.
- Developed 6+ projects, including data visualizations and predictive models.
- Applied Python, Excel, and machine learning libraries to solve real-world problems.
- Improved model accuracy and data processing efficiency across multiple datasets.

Data Science Intern, CodSoft
Remote | July 2023 – September 2023

- Developed 6+ data science projects using Python and machine learning techniques.
- Improved model accuracy and workflow efficiency through optimized data pipelines.
- Published projects on GitHub, showcasing practical applications and results.
- Collaborated on end-to-end project development and data analysis tasks.

Education

Bachelor of Science | Faculty of Science, Tanta University | Computer Science

Gharbia | Expected in January 2027

Projects :

1. Sales Forecasting and Demand Prediction – *May 2025* •

Group project on forecasting sales and predicting demand.

- Contributed in modeling for accurate predictions.
- GitHub Link

2. Unemployment Prediction in India – *Aug 2025*

- Developed predictive models for unemployment trends in India.
- Focused on data preprocessing and modeling.
- GitHub Link

3. AI Breakup Recovery Agent – *Dec 2025*

- Created an AI agent for emotional support with 4 modules: Therapist, Closure, Recovery, Portal.
- Responsible for agent design and integration.
- GitHub Link

4. International Sales Dashboard (Excel) – *Jul 2025*

- Built Excel dashboard with sales predictions and insights for international markets.
- Automated data visualization for decision-making.
- GitHub Link

5. Education Dashboard (Excel) – *Nov 2025*

- Developed Excel dashboard for analyzing educational data.
- Focused on interactive visualizations and reporting.
- GitHub Link

Certifications :

- Freelance Project – ITIDA GIGs Platform (June2024-September)
- Digital Egypt Pioneers – Data Science Track (Nov 2023–May 2024)
- Data Science Internship – CodSoft (Mar–Apr 2025)
- Data Science Internship – Code Alpha (Jun–Jul 2025)
- AI Program – IBM SkillsBuild (Completed 2024)
- UNICEF "Meshwary" Program (Jan–Feb 2021)
- Modern Leadership – STJEGYPT (Apr 2025)
- Communication Skills – STJEGYPT (Apr 2025)
- Time Management – STJEGYPT (Apr 2025)

Languages :

- Arabic: Native
- English: B1 (Intermediate)
